github.com/khanaarizkhan008-spec

PROFESSIONAL SUMMARY

First-year B.Tech student specializing in AI/ML with a track record of building scalable, user-centric full-stack applications. Experienced in Python, JavaScript, and React.js, with a focus on deploying AI-driven solutions that bridge the gap between technical complexity and practical daily utility.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning (Expected 2029)

NxtWave Institute of Science and Technology

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy), JavaScript (ES6+), C++, HTML5, CSS3

Frameworks & Libraries: React.js, Tailwind CSS

Developer Tools: Git, GitHub, VS Code, RESTful APIs

Core Concepts: Data Structures & Algorithms (DSA), UI/UX Design, Machine Learning Basics, Responsive Web Design

PROJECTS

HostelMate | Student Wellness & Survival App

- Engineered a full-stack wellness platform using React.js to assist 50+ students in transitioning to hostel life, resulting in a 30% reduction in reported "settling-in" friction.
- Architected an AI-driven chatbot for emotional support, utilizing sentiment analysis logic to provide real-time resources and improve user engagement.
- Developed a hyper-local discovery feature that increased community interaction by facilitating peer-to-peer skill sharing.

AcademiFlow | Academic Productivity Platform

- Designed a time-management system that tracks "Planned vs. Actual" study hours, providing users with personalized productivity analytics via data visualization.
- Implemented a responsive UI with React.js, ensuring 100% cross-device compatibility.

Glow Date | Social Connection Platform

- Developed an AI-based emotional compatibility system that leverages guided conversation frameworks to foster meaningful user interactions.
- Integrated a compatibility scoring algorithm to reduce "match fatigue," focusing on safety and high-intent user connections.

RELEVANT COURSEWORK

- Artificial Intelligence & Machine Learning: Neural Networks, Statistics, Python for Data Analysis
- Computer Science Fundamentals: Data Structures, Object-Oriented Programming (OOP) in C++
